

Curriculum Vitae

Stine Mari Godeseth

Master of Economics and Business Administration

Phone: +47 954 39 223

E-mail: stine.mari.godeseth@vista-analyse.no

Profil

Stine Mari holds a master's degree in Economics and Administration from the Norwegian School of Economics and Business Administration and Cornell University, with a specialization in economics and industrial organization. Stine Mari joined Vista Analyse from the Norwegian Ministry of Finance in 2020, where she was responsible for budget work with the Ministry of Transport, the Ministry of Culture and the Ministry of Health Services. The work consisted of assessing the economic and social consequences of proposals from the ministries as a basis for recommendations to the political leadership in the Ministry of Finance. Furthermore, she has experience as an asset manager in the ownership department in the Ministry of Trade, Industry and Fisheries and from the Norwegian Competition Authority.

In Vista Analyse Stine Mari has been involved in many different projects, especially in cost benefit analyses and evaluations. Stine Mari is well trained in conducting economic analysis that satisfies the requirements that follow from public approval processes, as well as the preparation of business economic analysis. She has experience with data collection from interviews, document analysis and surveys.

Education

- 2014 MSc in Economics and Business Administration, Norwegian School of Economics and Business Administration. Exchange to Cornell University, Samuel Curtis Johnson Graduate School of Management.
- 2012 Peace and conflict studies, Oslo and Akershus University College (OsloMet)/Kulturstudier

Work experience

- 2020- **Vista Analyse**, senior consultant
- 2014-2020 **The Ministry of Finance**, senior advisor (from 2019) in the Budget Department.
- 2018-2019 **The Ministry of Trade, Industry and Fisheries**, asset manager in the Ownership Department

2013-2013 **The Norwegian Competition Authority**, student employee

Projects

- 2023**
(in progress) **Vikafjellstunnelen på rv. 13: Socio-economic effects and other effects**
Nye Veier AS
Vista Analysis has prepared a socio-economic analysis with assessments of public security and other important factors related to the Vikafjell project, which is part of rv. 13 Skare-Sogndal.
- 2023**
(in progress) **Process evaluation of “Arkeologi på Nye Veier”**
Nye Veier AS
Nye Veier AS (New Roads) is conducting a pilot project in order to test new methods and procedures for archaeological investigations and excavations when building new roads. Vista Analysis is evaluating the pilot project.
- 2022**
New ICT-system for public pensions: KS1
Ministry of Finance and Ministry of Labour and Social Inclusion
Quality assurance (KS1) of alternatives for new ICT for public pensions.
- 2022**
Surveying the extent of financial crime
Ministry of Justice and Public Security
Using survey and interview techniques we estimate the extent of financial crime in Norway towards public and private businesses.
- 2022**
Transport solutions for the elderly
The Norwegian Directorate of Health
The project shall provide an overview of transport solutions available to the elderly in Norway today, an assessment of how these work and proposals for new solutions.
- 2022**
The socio-economic value of sports facilities and the importance of physical activity
Norwegian Sports Federation
We use the sports facilities register and data from the Ungdata scheme to identify variations in physical activity among young people that coincide with variations in investment levels in sports facilities in the municipalities.
- 2022**
Preliminary analysis of socio-economic effects and possible ripple effects of mineral extraction
Norge Mining
Based on business cases from Norge Mining and notes on environmental, social and governance issues and risks, we provide an overview of the socio-economic consequences and ripple effects of a possible mining project.
- 2021**
Health economic analyses and uncertain and innovative treatment options
Association of the Pharmaceutical Industry in Norway
In this project, we take a closer look at how uncertainty is treated in health technology assessments, and how uncertainty should be taken into account to ensure that new therapies are assessed in line with well-established principles for cost-benefit analysis.
- 2021**
The socioeconomic benefits of music
The Council for Music Organisations in Norway
The project analyzes the socio-economic benefits of the voluntary music organizations. The report puts music into a socioeconomic perspective and discusses the socioeconomic benefits from music and how these benefits can be measured and valued.
- 2021**
Regional policy instruments for developing industrial activity in Norway

Samarbeidande kraftfylke ("Kraftfylka")

We assess the usefulness of policy instruments available at the county-level (fylker) for promoting industrial development, in particular industry based on energy resources. The assessment is based on a survey of 49 regional politicians and civil servants.

2021 Evaluation of the Sami Parliament's strategy on development of education textbooks and digital learning materials

The Sami Parliament

Vista Analyse and Deanu giellagáddi (Tana Sami Language Centre) performed an evaluation of the Sami Parliament strategy and support scheme for development of education textbooks and digital learning materials. Production, advertisement and how the learning materials were made available was in the core of the evaluation project.

2021 Survey on the organisation of the professional groups and interaction on the professional and health policy work of the Norwegian Nurses Organisation

Norwegian Nurses Organisation

The project involves a mapping of the role of the professional groups in the organisation through interviews and a survey, including their interaction with departments and bodies in the organization, their importance for member democracy and members' professional involvement.

2020 Evaluating the prevalence of structural racism in the city of Bergen

Bergen Municipality

Using qualitative and quantitative methods we assess and evaluate the prevalence of structural racism in the city of Bergen.

2020 Spending review of medicines under the National Insurance Scheme

Ministry of Finance and Ministry of Health and Care Services

The purpose of the review is to assess possible measures to reduce the public budget costs of the blue prescription (prescription medicines which are covered fully or partly by the National Insurance Scheme).

2020 Lifetime in economic analysis – a guideline

Nye Veier AS/Transportetatenes metodegruppe

In practical cost-benefit analysis the lifetime of a project is an important, yet opaque topic. We develop a guideline for how lifetime should be approached in economic analysis.
